Civil Engineering
and Construction

Reliable.
Experienced.
Engaged.

Overview

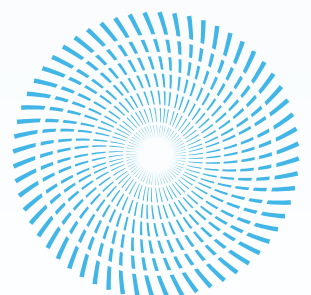

At inGauge Energy, we take pride in being Australia's only dedicated lifecycle well engineering provider, backed by three ISO accreditations. Our mission is to provide comprehensive civil engineering solutions that keep your energy infrastructure projects running smoothly.

From the very first spark of an idea to the final handover, we ensure every step is executed seamlessly, with a strong emphasis on compliance, safety, and efficiency.

What we do

We specialise in delivering civil engineering and construction solutions that are as unique as the energy projects they support. Whether it's securing environmental approvals, managing complex projects, sourcing materials, or overseeing contractors, we're with you every step of the way.

Our services cover the full project lifecycle, and we're committed to delivering on time, on budget, and to the highest standards of safety and sustainability. We take pride in ensuring your vision becomes reality, with every detail considered.

Why us?

We bring civil construction expertise deeply embedded in the energy industry and a team who know knows what it takes to bring energy projects to life on paper and on the ground.

Lifecycle delivery

From early design through to commissioning, decommissioning and rehabilitation, we manage every stage of your project with precision. Having the same team committed to your project means fewer handovers, more control, and better results.

Energy expertise

We specialise in civil engineering works that support and enable power exploration, production and transmission from well pads and access roads to laydown yards and site facilities.

Efficient and reliable

We leverage our extensive supplier and contractor networks to enable agile planning, fast mobilisation and experienced project leads who keep projects moving in even the most challenging environments.

Compliance with quality

With three ISO accreditations and a deep track record in safety and environmental performance and regulatory approvals, we bring capability, discipline and trust to every project.

Proven results

Our track record of delivering complex energy projects successfully in Australia's unique landscape is second to none. With an in-house team ready to mobilise, we bring deep experience and foresight to anticipate risks, solve problems and keep your projects on track from day one.

What we've done

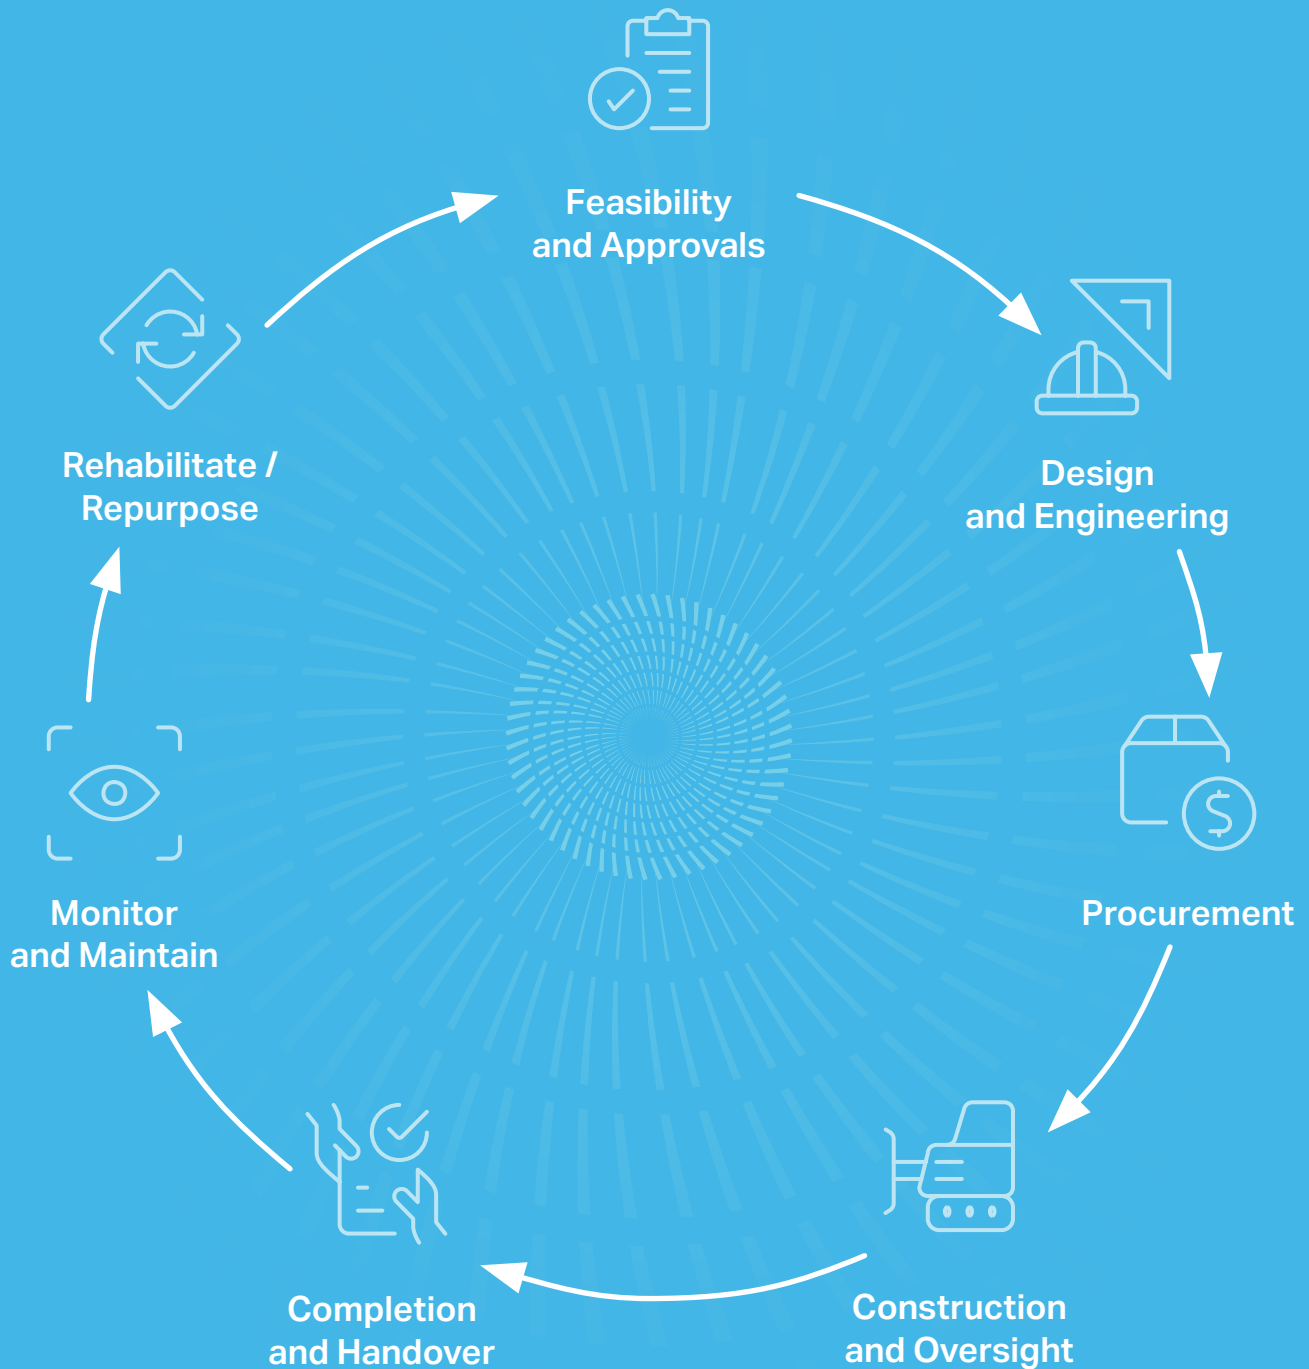

With a legacy of successful infrastructure delivery across Australia's energy sector, our team have earned a reputation for reliability, compliance, and performance under pressure. Our track record of unique project deliveries reflects the strength of our systems, the depth of our expertise, the trust of our clients and our ability to bring fresh thinking and unconventional solutions which make an impact.

Our Achievements:

- **Successful project deliveries**
Our track record includes successful seismic acquisitions, well and gas plant developments, and civil projects across the energy sector.
- **ISO Accreditations**
inGauge Energy holds three ISO accreditations, showcasing our commitment to quality, environmental stewardship, and operational excellence.
- **Industry leadership**
As Australia's only dedicated lifecycle well engineering provider, we are recognised as a leader in providing integrated, full lifecycle solutions to the energy industry.
- **Effectively coordinated large-scale contractor networks**, ensuring compliance and seamless execution.
- **Executed turnkey project solutions** that deliver measurable value, safety, and sustainability to clients.

End-to-end project lifecycle support

Our core services

Civil engineering and construction

We design and construct resilient infrastructure, including well sites, access roads, and supporting facilities, ensuring durability, safety, and regulatory compliance.

Project management

Our expertise in civil project management sets the foundation for successful seismic acquisition, well, and gas plant developments. We provide comprehensive services, including civil design, procurement, and contractor management, ensuring each project is executed with precision and efficiency.

Our civil design solutions are integral to securing environmental approvals, as they prioritise sustainability and compliance with regulatory standards. From planning through to execution, we deliver tailored solutions that support your operational goals while upholding environmental stewardship.

Contractor management

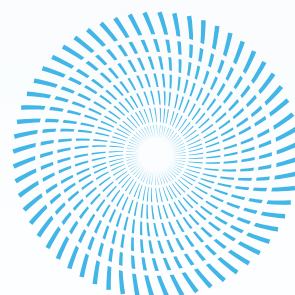

Our network of industry connections provides fast, easy and reliable access to high quality experts bringing vast experience of supervising and co-ordinating contractors to maintain operations, safety and environmental compliance, regulatory management and adherence to project specifications throughout the construction lifecycle and beyond.

Procurement

Our network and knowledge ensures we're in pole position to deliver comprehensive procurement and contracting services for your civils projects, from strategy development to execution.

Key services include:

- **Full tender process management:**
End-to-end oversight of tendering processes, from drafting requests for proposals (RFPs) to bid evaluation and contract award, ensuring transparency and competitiveness.
- **Contracting services:**
Development and management of contracts with vendors and subcontractors, maintaining compliance with industry standards and regulatory requirements.
- **Strategic sourcing:**
Identification and acquisition of materials, equipment, and services to meet project specifications efficiently and cost-effectively.
- **Supplier management:**
Establishing and maintaining strong relationships with suppliers to ensure reliability and quality throughout the project lifecycle.
- **Cost control and optimisation:**
Implementing procurement strategies that maximise value and minimise costs.
